Dear Mr. Pedersen,

That Ruby interrogation is so far in the past in my work I now do not remember clearly but I think it was published by the Warren Commission. If that is correct it can be abtained from the JFK Assassination Archive, The National Archives, College Park, MD but I do not have the zip. The cost is usually about 25¢ a page.

I do not conjecture theories that identify the conspirators because we do not have enough information to be able to do that and not deceive the people and ourselves.

While I appreciate and have read your long snd thoughtful letter - and the questions you say have bothered you are good questions - I can add nothing to what I have published.

Best regards,

Harold Weisberg
